11) Do you know the difference between the ARTAS procedure and previous forms of hair transplantation procedures?

- Yes No If yes, what research have you done? _____

HOW TO TAKE A PHOTO FOR A HAIR TRANSPLANT CONSULTATION

When taking the photo, make sure to clearly center the areas of hair loss on your head that bother you.

ANGLES

1. Shoot from the front, straight on/eye level.

2. Look down 45° to show front of hair line.

3. Tuck chin to chest, and shoot the crown/top of your head.

4. Shoot the right side of your head. Hold camera at ear level, arm fully extended, in right hand. Repeat for left side of head with opposite arm.

5. Shoot from behind, while looking up to show the crown of your head.

6. Shoot from behind your head while looking forward. Use your other hand to lift up the hair at the back of your scalp.

HELPFUL HINTS

1 Don't hide your hair loss. If your hair lies over your problem areas, wet hair and brush away from hair loss areas.

2 Choose a bathroom with strong lighting so that you don't need to use a flash. Use the mirror to assist with camera angles.

3 If you are using a modern smartphone, use the main camera lens on the back of the phone. Do not use the front of the phone to take a selfie. This may require a few attempts to get it right.
